Leg Broken.

THE APACHE WAR

A Quarrel Among Themselves Causes the Trouble.

TUCSON, Arizona, July 31.—Further reports of the trouble on the San Carlos Indian Reservation tend to show that the Indians had been stealing cattle and preparing a supply of dried meat preparatory, it is assumed to an outbreak of hostilities. When the party went to arrest the hostiles they opened fire and killed three Indian scouts. The posse returned the fire, wounding several of the band, which immediately left the reservation followed afterwards by others, all going for the mountains.

WASHINGTON, July 31.—The War Department is in receipt of the following telegram from the commandant at San Carlos, Arizona, forwarded by General Howard under date of July 29. "Captain Lee under discretionary orders which I had given him prior to the receipt of your telegram of this date has just returned to his post."

He reports that the trouble resulted from a quarrel among the Indians themselves. Cap. Lee remained upon the ground until 4 p. m. today, when he concluded that the Indians were not disposed to leave, and that his presence tended to excite them. Captain Lee then returned to this post. From an Indian Lee learned that those ordered to be arrested were seen near camp today, and he is of the opinion, and I concur, that these Indians can be arrested quietly in a few days. The cattle herd is undisturbed. A full written report by Monday's mail. My command is in readiness and will move out at once if I find it necessary."

Another dispatch sent by General Howard from the commanding General of the Department of Arizona, states that all post commanders have been notified to use every effort to promptly intercept raiding parties.

TO HELP FREE TRADE.

British Gold Cutting a Figure in the Campaign.

New York, July 29th.—The Mail and Express starts a story that a large amount of money has been subscribed in England to secure Cleveland's re-election, and says:

"A gentleman recently from England declared that Englishmen are interested in American politics and are anxious that Cleveland should be re-elected. He heard and fully believed that English manufacturers had already cheerfully subscribed nearly two million sterling toward the Democratic campaign fund."

The Mail and Express seemingly credits the story, and says it is believed the fund reported subscribed by the British has reached this country and is now at the disposal of the Democratic National Committee, with and by the advice of President Cleveland.

CLIM BERRY IN JAIL.

An Outrage on the Public.

The APPEAL sincerely regrets the detention by the city authorities, of Hon. Clementis Berry, (colored) Mr. Berry, among other duties about town, sweeps out the APPEAL's sanctum—that is, of course, when he is not sweeping out Sheriff Ullrich's sanctum in the county building.

He has been snatched into the tank for 30 days, during which time the Sheriff gets the benefit of his services, and the APPEAL's sanctum becomes more and more like a pigpen in distress, daily. About 100 exchanges come in a day, and if they are not removed by Mr. Berry, 3,000 will accumulate in 30 days and lift the top of the roof off.

Mr. Berry also has other places to keep tidy, and sleepy men to awaken at five in the morning, and he will be sadly missed about Carson during the month of August.

It seems to us that if he could be allowed to slide out at 4:30 in the morning and wake people up, sweep the APPEAL's sanctum out once a week, and then slide back to cell 6, the public interests would still be subserved.

Pumping With Air.

Dr. Pable of Georgetown, Colorado, has discovered that by means of air—without any machinery other than a pump column—water may be raised to any height. It is well known that the atmospheric pressure at the level of the sea will raise water to a height of 33 feet and to a proportionate height at other places according to altitude. By the plan a jet of compressed air is let into the water at the bottom of the pipe through a hole one-eighth or sixteenth of an inch in diameter. Air thus let in under a pressure of 45 pounds to the square inch does not bubble up through the water as would be expected. It forms a succession of balloons or air pistons, each of which carries up with it a certain load of water. These air pistons rush up with great velocity. In Colorado, water is now being pumped in this way to a height of 300 feet. How much higher water may be pumped by this plan no one knows, as no attempt has yet been made to work the system to a greater height.

The Red Fox.

Mr. James Ward closed his engagement here last evening with a clever presentation of "The Red Fox," a sparkling Irish drama, which strikes one as being free from the clap trap which as a rule pervades the regulation Irish drama.

Mr. Ward is an Irish comedian whose clever delineations portray the most pleasing elements of the Irish character. Wit, pathos, mirth, humor and a sterling patriotism are the compounds that go to make up the characters of Roddy in the "Red Fox" and Shaun in "Arrah na Pogue," both of which characters Mr. Ward has made, so to speak, his own. Carrie Clarke Ward in the respective characters of Mave Carolan and Arrah Meelish was a typical Irish beauty, and played both parts splendidly.

It was hardly fair of Mr. Piper to bring Mr. Ward here for two nights in the middle of the Summer season, when most of our theater goers are at the Lake. One good audience is better for both actor and audience than two small ones.
